TruStitch™ Technology

Maximum speed control settings

SEPARATE BOBBIN WINDER

SEWING

- Select **Regulated Mode**
- Set SPI at 12
- Touch start and move the fabric.
- Have the customer write their name or do meander stitching.

- Set speed at 100% press foot pedal all the way down and stitch. Change to 20% and stitch again

- Show Bobbin Winder
- Place an empty bobbin on the bobbin winder and demonstrate how it works.

TALK ABOUT

- With the addition of the TruStitch™ device you can easily add stitch regulation to your machine. This will keep all of your stitches the same length, no matter how fast or slow you move your fabric.

- With the ability to set your preferred speed you can hold the foot pedal all the way down and stay at that speed. This is more comfortable and gives you greater control.

- The PLATINUM™16 uses a large capacity bobbin. Use the bobbin winder to wind several bobbins before you begin your project.
