SEWING & EMBROIDERY

BRING YOUR EMBROIDERY DREAMS TO LIFE
Feature Rich and Affordable

- **Optimizing Embroidery**
  With 13 built-in embroidery fonts and 193 built-in embroidery designs, the SE2000 is the ideal machine for your next project. Additional embroidery designs include colourful motif patterns, youthful appliqués, and alphabet and frame patterns.

- **Wireless LAN Capability**
  Send files from your PC to your machine via the free downloadable software Design Database Transfer[1] (no USB required), so you can send and then stitch! This unique quality allows for easy data management for all your designs. You can also create and send designs through PE-DESIGN 11[2] for even more flexibility.

- **Advanced Colour Sort and Jump Stitch Trimming**
  Use the Advanced Colour Sort, which adjusts the order in which multi-colour embroidery designs are stitched, reducing colour changes and making it more efficient. In addition, the practical Jump Stitch Trimming function automatically trims any excess thread jumps within the colour.

- **Artspira Mobile App[1] – Available Fall 2022**
  Download designs or make your own embroidery designs by drawing on your mobile device. Draw line-art inspired designs up to 5" x 7". View your completed drawing on the Stitch Simulator so you can see how your design will look when stitched out. The Artspira mobile app lets you share your creations on many social media platforms as well.

- **Generous Workspace**
  Generous 5" x 7" embroidery area, a 3.7" LCD display, and compatibility with the 4" x 7" Brother magnetic frame[2].

- **LCD Display**
  See your designs on the sharp 3.7" LCD display, which allows for easy on-screen editing, including letter editing and combining designs.

Basic Features

Accessory Storage	•
Adjustable Screen Brightness	–
Adjustable Presser Foot Pressure	•
